

Домашнее задание № 10

- 1) На сборочной ноды подготовлены файлы для сборки

```
root@compute-vm-2-2-10-ssd-build:~# ls
Dockerfile  index.html
```

- 2) В Jenkins для сборочной ноды настроена параметризованная джоба для сборки образа и передачи его в пехус. Запустить джобу

Проект hw10_build_push_to nexus

Для этой сборки необходимы следующие параметры:

version

▶ Собрать

Cancel

3) Результат сборки

 **Jenkins** / hw10_build_push_to ne... / #9 / Вывод на консоль

Статус

```

4) Образ передан в нексус

5) В Jenkins для продовой ноды настроена параметризованная джоба для скачивания образа из nexus. Запустить джобу

Проект hw10_prod_pull_from_nexus

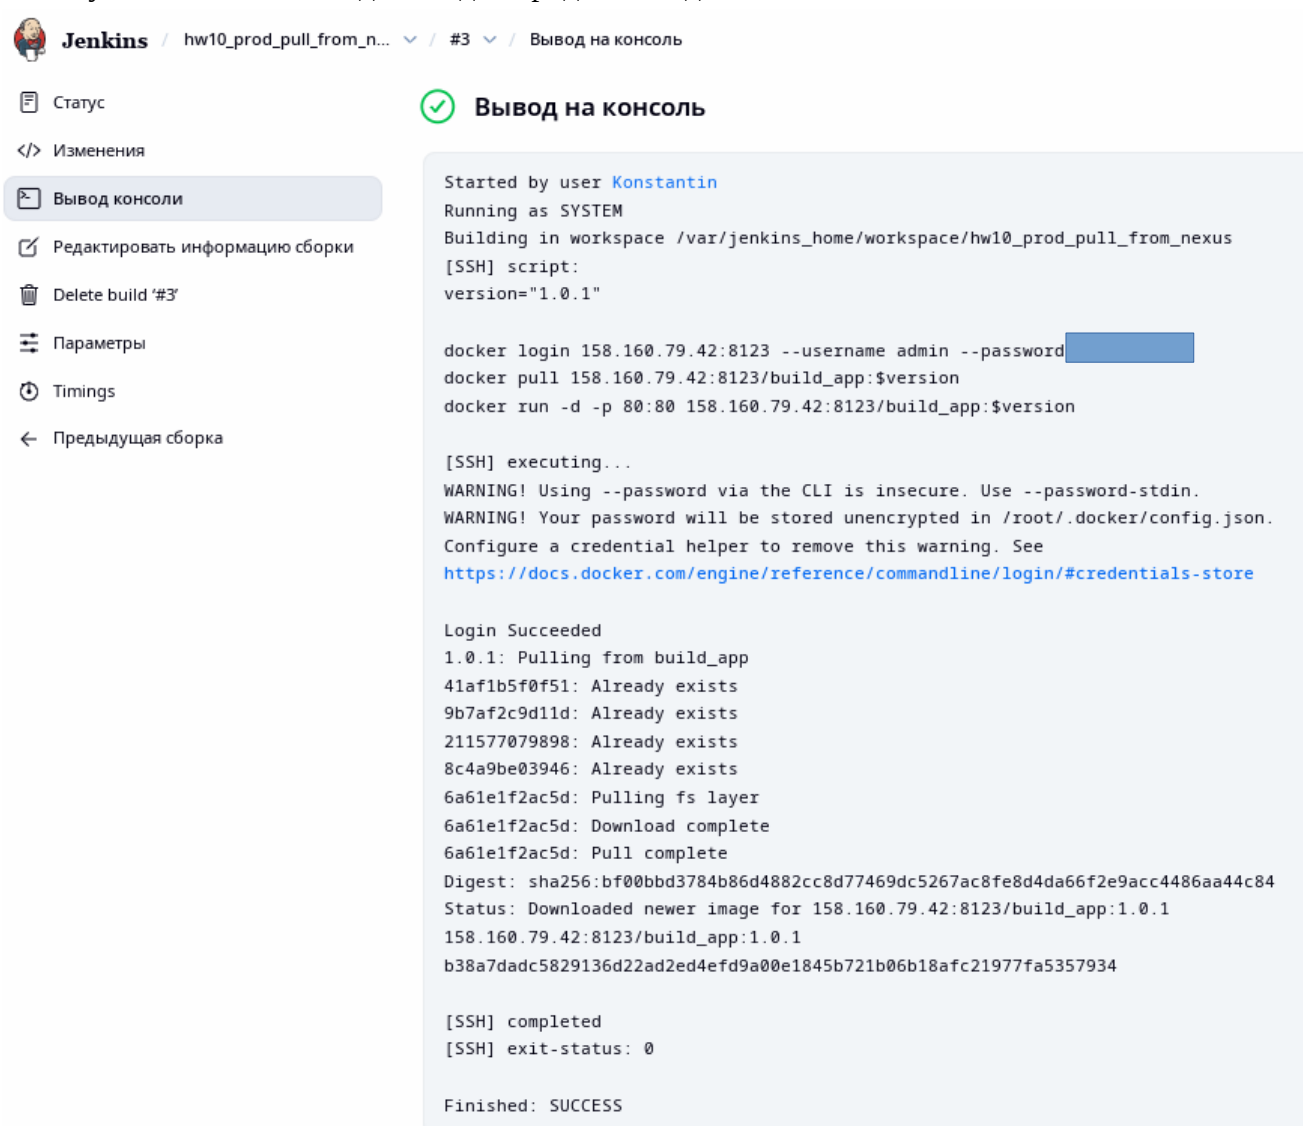

Для этой сборки необходимы следующие параметры:

version

▶ Собрать

Cancel

6) Результат выполнения джобы для продовой ноды

The screenshot shows the Jenkins web interface. The breadcrumb navigation at the top reads: Jenkins / hw10_prod_pull_from_n... / #3 / Вывод на консоль. On the left sidebar, the 'Вывод консоли' (Console Output) tab is selected. The main area displays the console output for build #3, which is titled 'Вывод на консоль' with a green checkmark icon. The output text is as follows:

```
