

Домашнее задание № 7

- 1) Запустить сборку в папке, где расположен файл docker-compose.yaml

docker-compose up -d

```
root@compute-vm-8-8-65-ssd-lesson5-gitlab:/home/ikonstbai/hw07/hw# docker-compose up -d
WARN[0000] /home/ikonstbai/hw07/hw/docker-compose.yaml: the attribute 'version' is obsolete, it will be ignored, please remove it to avoid potential confusion

- 2) Приложение доступно по адресу **IP VM:8080/hello-1.0**

Congratulations!

boxfuse

You have successfully launched your Instance!

This Instance is running on **null** and has the id **null**.

It is based on the Image **null** generated from **null**

Now it's your turn!

Check out [this app](#) from GitHub, modify it, and give it version 2.

You are now ready to fuse and **deploy it with zero downtime** using the commands you already know.
